

## Discover the benefits of **CareUnity® Digital**

The latest innovation in digital telecare offering  
ultimate flexibility, reliability, and connectivity

The Chubb CareUnity® Digital dispersed alarm unit is one of the most technically advanced care alarms on the market, supporting the latest 4G technology.

With more than 50 years' experience in providing specialist telecare solutions, Chubb is here to support service providers in helping their customers make a smooth transition from analogue to digital technology.

Designed to encourage independent living, CareUnity® Digital sets new standards for technology-enabled care, ensuring the home environment is monitored 24 hours a day.

When the panic button is triggered, the care alarm unit will instantly dial the emergency contact or control centre to notify them that assistance is needed, providing invaluable reassurance to the individual and their family.

## Features

- Small, sleek, modern design
- Crystal clear 2-way audio
- Supports multiple networks
- “Person down” facility
- Enhanced reminders and SMS text message reporting

# CareUnity® Product Range

The alarm unit also supports a variety of other wireless sensor devices including; pendant and fall triggers, bed and chair sensors, door keypads and many more.

## High-Performance Pendant

Lightweight personal alarm trigger can be worn around the neck.

## Bogus Caller Button

Next to the front door or bedside allows the user to raise the alarm.

## Fire Alarm

Automatically sends an emergency alarm signal to the monitoring centre.

## Wrist-Worn Fall Detector

A discreet way of wearing a fall sensor. Includes an integrated alarm button.

## Flood Alarm

Acts as an early warning to reduce the risk of flooding.

## Ramblegard® Floorgard

This wireless floormat will trigger an alarm when the user steps onto the mat.

## Ramblegard® Seatgard

Wireless for use on top of or under a cushion, it will trigger an alert when pressure is released.

## Ramblegard® Bedgard

This wireless pad will send out an alert if the user attempts to sit up or get out of bed.

## Ramblegard® Wireless Under Mattress

Placed under the mattress, the wireless pad will send out an alert if the user attempts to sit up or get out of bed.
