

Chubb hand-held temperature camera solution flyer

Protecting your world

Chubb can supply hand held cameras with the capability to detect body temperature. Ideal for monitoring body temperatures at entrances of buildings. Easily re-deployed by on-site staff and the electronic components of the temperature monitoring equipment require no network integration to existing on-site networks or systems.

Benefits:

- Ideally suited to rapid deployment such as queue scanning
- 160 x 120 resolution (thermal)
- Up to five hours continuous monitoring
- Wi-Fi capable
- Tripod mountable
- Thermal view and overlaid details of the picture detect high body temperatures
- Leading thermal image processing technology

The kit:

- 1x Hand-held thermo graphic body temperature camera

Body temperature measurement camera

DISCLAIMER: Please note the thermal detection equipment we offer provides preliminary temperature screening and are not medical devices. The equipment is able to identify individuals that indicate a higher than average temperature but is not capable of identifying individuals suffering other symptoms of any illness. Elevated body temperatures may result from a number of factors, including those related to the environment, activity or other elements affecting the individual. Chubb makes no claims regarding the accuracy or effectiveness in the diagnosis of any medical state, symptom, illness or condition.

This briefing is intended as general guidance and is not a substitute for detailed advice in specific circumstances. Although great care has been taken in the compilation and preparation of this edition to ensure accuracy, Chubb cannot in any circumstances accept responsibility for errors, omissions or advice given or for any losses arising from reliance upon information contained in this publication.
